Data by estimated value of agricultural operations class

Change in collection scope for ABS rural environment and agricultural commodity collections

A change in collection scope has been adopted for the 2015-16 Agricultural Census and the 2015-16 Land Management Practices collections. The ABS has increased the minimum value of the estimated value of agricultural operations (EVAO) used to scope agricultural businesses from \$5,000 and greater to \$40,000 and greater. This change is expected to continue for future ABS rural environmental and agricultural commodity collections in 2016-17 and beyond.

The change in scope cut-off value will align the ABS definition of an agricultural business with that used by the Australian Bureau of Agricultural and Resource Economics (ABARES), and will bring the ABS's agricultural survey program more in line with other ABS business surveys. It will also decrease the number of businesses in scope of the collections thereby reducing respondent burden and improving collection efficiency.

To assist understanding the effect increasing the EVAO scope cut-off value will have on 2015-16 Agricultural Census and Land Management Practices Survey outputs, estimates consistent with the revised scope are being made available for a number of rural environment and agricultural commodity surveys from 2010-11 to 2014-15. These will provide a time series based on the new scope over a 5 year period and will be released progressively from December 2016.

Guide to interpreting estimates presented in this datacube

This datacube presents estimates from the 2014-15 Rural Environment and Agricultural Commodities Survey (REACS). Included are estimates of agricultural land use, crop and horticultural area and production and livestock numbers. Data are presented at the national, state/territory and sub-state levels.

In addition to the geography classification, estimates are presented for three EVAO population classes: those with an EVAO of \$5,000 or greater (old basis cut-off); those with an EVAO of \$40,000 or greater (the revised cut-off); and those from businesses with an EVAO of \$5,000 to less than \$40,000.

The EVAO scope cut-off classification column uses the following annotations:

- OB Estimates from businesses with an EVAO of \$5,000 or greater (old basis cut-off)
- AA Estimates from businesses with an EVAO of \$40,000 or greater (the new EVAO scope cut-off)
- AZ Estimates from businesses with an EVAO between \$5,000 to less than \$40,000 (no longer in scope)

Where estimates have a np annotation they are not available for publication. If an estimate was suppressed in the previously released 2014-15 datacube (using the old basis cut-off) it will continue to be suppressed in the old basis cut-off EVAO classification. In addition, these estimates are not presented for either of the two other EVAO classifications.

np not available for publication but included in totals where applicable, unless otherwise indicated

.. not applicable

* estimate has a relative standard error between 25% and 50% and should be used with caution

** estimate has a relative standard error greater than 50% and is considered too unreliable for general use

^ estimate has a relative standard error of 10% to less than 25% and should be used with caution

(a) Year ended 30 June.

(b) Includes lentils, navy beans, field peas for grain, faba beans, lupins and chickpeas

(c) Yield is equal to production divided by the number of trees of bearing age

(d) Excludes pome, citrus and stone fruit. This data item may not be directly comparable with earlier years

(e) Yield is equal to total production divided by the area of bearing age

(f) Excludes grapes, plantation fruit and berry fruit

(g) During reference period

(h) Includes bulls and steers

(i) Includes boars, gilts, suckers, weaners, growers and finishers

(j) E.g. horses, goats, domesticated buffaloes

(k) Includes hens in moult

(l) Includes safflower, soybeans, sunflowers, sesame, linseed

np not available for publication but included in totals where applicable, unless otherwise indicated

.. not applicable

* estimate has a relative standard error between 25% and 50% and should be used with caution

** estimate has a relative standard error greater than 50% and is considered too unreliable for general use

^ estimate has a relative standard error of 10% to less than 25% and should be used with caution

(a) Year ended 30 June.

(b) Includes lentils, navy beans, field peas for grain, faba beans, lupins and chickpeas

(c) Yield is equal to production divided by the number of trees of bearing age

(d) Excludes pome, citrus and stone fruit. This data item may not be directly comparable with earlier years

(e) Yield is equal to total production divided by the area of bearing age

(f) Excludes grapes, plantation fruit and berry fruit

(g) During reference period

(h) Includes bulls and steers

(i) Includes boars, gilts, suckers, weaners, growers and finishers

(j) E.g. horses, goats, domesticated buffaloes

(k) Includes hens in moult

(l) Includes safflower, soybeans, sunflowers, sesame, linseed

np not available for publication but included in totals where applicable, unless otherwise indicated

.. not applicable

* estimate has a relative standard error between 25% and 50% and should be used with caution

** estimate has a relative standard error greater than 50% and is considered too unreliable for general use

^ estimate has a relative standard error of 10% to less than 25% and should be used with caution

(a) Year ended 30 June.

(b) Includes lentils, navy beans, field peas for grain, faba beans, lupins and chickpeas

(c) Yield is equal to production divided by the number of trees of bearing age

(d) Excludes pome, citrus and stone fruit. This data item may not be directly comparable with earlier years

(e) Yield is equal to total production divided by the area of bearing age

(f) Excludes grapes, plantation fruit and berry fruit

(g) During reference period

(h) Includes bulls and steers

(i) Includes boars, gilts, suckers, weaners, growers and finishers

(j) E.g. horses, goats, domesticated buffaloes

(k) Includes hens in moult

(l) Includes safflower, soybeans, sunflowers, sesame, linseed

np not available for publication but included in totals where applicable, unless otherwise indicated

.. not applicable

* estimate has a relative standard error between 25% and 50% and should be used with caution

** estimate has a relative standard error greater than 50% and is considered too unreliable for general use

^ estimate has a relative standard error of 10% to less than 25% and should be used with caution

(a) Year ended 30 June.

(b) Includes lentils, navy beans, field peas for grain, faba beans, lupins and chickpeas

(c) Yield is equal to production divided by the number of trees of bearing age

(d) Excludes pome, citrus and stone fruit. This data item may not be directly comparable with earlier years

(e) Yield is equal to total production divided by the area of bearing age

(f) Excludes grapes, plantation fruit and berry fruit

(g) During reference period

(h) Includes bulls and steers

(i) Includes boars, gilts, suckers, weaners, growers and finishers

(j) E.g. horses, goats, domesticated buffaloes

(k) Includes hens in moult

(l) Includes safflower, soybeans, sunflowers, sesame, linseed

Australian Bureau of Statistics

712100007 201415 Agricultural Commodities, Australia-2014-15

Released at 11:30 am (Canberra time) Thu 19 January 2017

Data by estimated value of agricultural operations class

Table 5: AGRICULTURAL COMMODITIES, STATE AND SA4 REGION-South Australia-2014-15

np not available for publication but included in totals where applicable, unless otherwise indicated

.. not applicable

* estimate has a relative standard error between 25% and 50% and should be used with caution

** estimate has a relative standard error greater than 50% and is considered too unreliable for general use

^ estimate has a relative standard error of 10% to less than 25% and should be used with caution

(a) Year ended 30 June.

(b) Includes lentils, navy beans, field peas for grain, faba beans, lupins and chickpeas

(c) Yield is equal to production divided by the number of trees of bearing age

(d) Excludes pome, citrus and stone fruit. This data item may not be directly comparable with earlier years

(e) Yield is equal to total production divided by the area of bearing age

- (f) Excludes grapes, plantation fruit and berry fruit
- (g) During reference period
- (h) Includes bulls and steers
- (i) Includes boars, gilts, suckers, weaners, growers and finishers
- (j) E.g. horses, goats, domesticated buffaloes
- (k) Includes hens in moult
- (l) Includes safflower, soybeans, sunflowers, sesame, linseed

np not available for publication but included in totals where applicable, unless otherwise indicated

.. not applicable

* estimate has a relative standard error between 25% and 50% and should be used with caution

** estimate has a relative standard error greater than 50% and is considered too unreliable for general use

^ estimate has a relative standard error of 10% to less than 25% and should be used with caution

(a) Year ended 30 June.

(b) Includes lentils, navy beans, field peas for grain, faba beans, lupins and chickpeas

(c) Yield is equal to production divided by the number of trees of bearing age

(d) Excludes pome, citrus and stone fruit. This data item may not be directly comparable with earlier years

(e) Yield is equal to total production divided by the area of bearing age

(f) Excludes grapes, plantation fruit and berry fruit

(g) During reference period

(h) Includes bulls and steers

(i) Includes boars, gilts, suckers, weaners, growers and finishers

(j) E.g. horses, goats, domesticated buffaloes

(k) Includes hens in moult

(l) Includes safflower, soybeans, sunflowers, sesame, linseed
